Work at Clearbox AI

Who are we

We are a group of innovators that love to implement the newest AI technologies to solve business problems. Our professional and personal journeys across Europe converged in Turin, Italy, where we decided to join forces to pursue a shared mission: to enable responsible AI adoption in companies. That's how Clearbox AI was born in 2019.

We offer a very competitive market pay and flexible working options. Within a diverse and international team. Clearbox AI has a flat organisational structure and provides a highly trusting, open and safe working environment where employees have the optimal conditions to be innovative and to thrive. We have strong ethics and values and would like to create a positive impact on society with technology as powerful as AI.

Clearbox AI considers applicants for all positions without regard to race, colour, religion or belief, marital status, sexual orientation and gender identity.

What we do

We help companies to unlock AI and Analytics projects through the generation of Synthetic Data.

Synthetic Data is obtained by generating artificial data that incorporates an original dataset's statistical properties and distributions, thus reflecting real-world data. Gartner predicts that By 2024, 60% of the data used for the development of AI and analytics projects will be synthetically generated.

We have an exciting technology that helps us generate high quality synthetic data. We work on exciting and meaningful use cases related

to privacy preservation, data quality augmentation, bias mitigation and test automation to unlock and enrich AI projects.

Who are we looking for?

If you are a pragmatic idealist who wishes to join our synthetic data journey, we can't wait to meet you!

We are on the lookout for **data scientists** and **data engineers** who love to thrive in a trusting and autonomous high tech startup environment.

Ideally we are looking for folks with:

- MSc. in Computer Science/Engineering, Mathematics, Statistics, Data Science, or a related field
- Good Python skills
- Ability to process different types of data and draw insights from large data sets.
- An enthusiastic and adaptive team player with a drive to learn new technologies and techniques.

When?

After a long period of market discovery, we are currently gearing up to accelerate and scale our solution offering across Europe and hopefully worldwide.

We are currently preparing to raise our next round of funding, expected to close at the end of 2022. We expect to open several positions soon after the funding round and we want to already let you know about the potential opportunities!

If you wish to stay updated and within our career opportunities loop, please send us an email to careers@clearbox.ai and follow us on twitter @ClearboxAI and LinkedIn and of course there's always our website clearbox.ai

Flexible Workplace

Our offices are in I3P (Incubator of Innovative Companies of Polytechnic of Turin), in the heart of the Cittadella Politecnica (Torino).

We have flexible working options. Although we are digital natives and mostly work remotely, we meet at least once a week at the office to foster human interactions and team building.

On the other hand, you can come to the office every day if you so wish! No hard and fast rules there.
